

# IT PROGRAMMER JOB DESCRIPTION

## SUMMARY

Bahama Buck's Support Center is seeking an experienced Programmer with expertise in PHP, HTML, CSS, Ajax, Javascript, MySQL and MongoDB to join our friendly neighborhood IT Team. The successful candidate will be responsible for developing and maintaining software applications and websites, and ensuring the technologies meet the needs of our users and guests. This position requires proficient coding skills, attention to detail, and the ability to work collaboratively with other developers and team members.

## RESPONSIBILITIES

- Develop and maintain software applications and websites using PHP, HTML, CSS, Ajax, Javascript, MySQL, and MongoDB.
- Ensure that software applications and websites are scalable, reliable, secure, and ADA compliant.
- Write clean, well-documented, and maintainable code.
- Troubleshoot and debug issues with existing software applications and websites.
- Collaborate with other developers and designers to ensure that software applications and websites meet the needs of our users.
- Stay up-to-date with emerging trends and technologies in software development.

## QUALIFICATIONS

- Bachelor's degree.
- Experience in software development, with a focus on PHP, HTML, CSS, Ajax, Javascript, MySQL, and MongoDB.
- Strong understanding of web development concepts and technologies.
- Familiarity with Agile development methodologies.
- Experience working with version control systems such as Git.
- Excellent problem-solving and analytical skills.
- Ability to work effectively in a team environment.
- Strong communication skills, both verbal and written

If you have a passion for software development, and you meet the qualifications above, we would like to have a conversation with you.. This is a full-time inhouse position with a competitive salary and benefits package.
